NOTICE.

The first issue of this compilation was made in 1878, the statistics being brought down to 1876.

The second issue, in 1884, brought the statistics down to 1883.

When the second issue was under preparation, it was found that there were some errors in the first issue which had been compiled without complete knowledge of the import of the local returns.

The third issue, of 1885, brought the figures down to 1884.

It was then decided to issue this volume annually, and the present, which is the fifth issue, brings the figures down to the end of 1886.

The previous issues contained the district fortnightly prices for a long series of years in addition to the annual average prices. It is considered unnecessary to reproduce all these fortnightly returns from year to year. They would add greatly and increasingly to the bulk and cost of the volume, and as they can always be referred to in the first three issues by those who may desire to refer to them, it was decided in 1886 to confine the record of fortnightly prices in the fourth and future issues to those of the year.

The present issue accordingly contains:

Part I.—Annual average prices from 1861 to 1886.

Part II.—Fortnightly prices for 1886.

Part III.—Average monthly wage for each half-year from 1873 to 1886.

The returns of prices are compiled in this Department from fortnightly returns received from most districts in India and of wages from half-yearly returns. These are published regularly in the *Gazette of India*, and it is from the returns published in the Gazette that the figures in this volume have been extracted, the districts named in this record having been selected as typical of the different parts of each province.
